# Interactive Writing

Do you want meetings and presentations to be interactive, instead of passive? Our range of Interactive Writing products are designed to help you do just that. Choose from our extensive range – traditional, portable or mobile drywipe boards and flipchart easels, or USB enabled copyboards for the ultimate interactive experience.

# Choosing the right Whiteboard

Board surfaces are easy! We have three different types – melamine, magnetic steel, or magnetic enamel. Melamine is great for general use, and magnetic steel doubles up as a noticeboard. For intensive use, choose hard-wearing, scratch and chip-resistant enamel. With a twenty-five year guarantee, it's built to last!

# Prestige Drywipe Boards

Expect high-class features from Prestige drywipe boards. From the eye-catching brushed aluminium frame and factory-fitted pen tray to the unique Easyfix brackets, installing and using Prestige promises to be a rewarding experience.

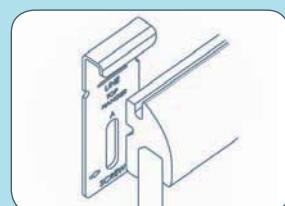

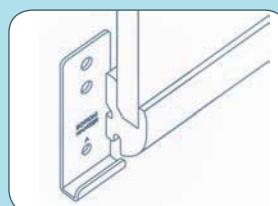

## Unique features!

Prestige boards with a melamine surface incorporate a light grey dotted grid in the board surface – great for drawing graphs and charts or for structured writing.

## Easyfix System

Want a board that is easy to fix to the wall, and just as easy to remove for decorating or moving office? No need to mark screw holes in board corners – simply fix both bottom brackets to the wall and slide board onto brackets. Easy to make sure board is level as two points are immediately secure. Simply mark top of board and fix top brackets, slide board onto bottom brackets and push top brackets down to secure the board. To remove board for decorating or relocation – reverse the above process.

# Essential Whiteboard Maintenance

Most people don't know that you should clean whiteboards regularly to keep them in tip-top condition. Follow these easy steps, and your whiteboard will provide you with a perfect drywipe surface you can be proud of.

## Permanent ink? No problem!

Use Nobo Deepclene to remove permanent ink and other stains from your whiteboard

## Recommended

### Everyday

Use a Nobo eraser or drywiper cloth whenever you have finished with the board, or at least at the end of each day. It's a simple courtesy to colleagues to leave the board in a clean condition for the next user.

### Weekly

Every week, or after heavy pen use, re-condition the board's surface with a proper wet clean. Use a Noboclene spray cleaner and Drywiper cloth, or Noboclene wipes. Make sure you let the surface dry off properly before using again.

### Monthly

Using a board renovator will restore your board to its original factory surface. All traces of dirt, grease and dust will be removed, along with any ghosting or permanent pen residue. Use Nobo Deepclene Plus for a perfect result every time.

# Flipchart Easels

The versatile flipchart easel can be used for so many things...to display information, to prepare for a meeting or as an essential brainstorming tool for interactive discussions; capturing ideas and thoughts and displaying them by the side of the writing board. Whatever you need one for, there will be a flipchart easel perfect for you!

## Piranha Easels

**The professional choice for perfect presentations.**

Standard base for use in one room, mobile base for ultimate flexibility. Unique removable writing rule for perfectly straight writing, or use to underline key points neatly during presentations. Extending magnetic side arms in the top of the easel slide out easily when extra pages need to be displayed. Large, magnetic drywipe writing board, with room to store display magnets. Folding pen tray keeps pens and magnets secure when moving the easel. Both easels are height adjustable.

# T-Card Kits

T-Card kits are a great visual planning and tracking tool. With the option of planning weekly, annually, or for specific projects, they can be as flexible as you need them to be! Once you have decided which time frame you need, use the title strip and index panel to set out times, dates, project names and so on. Use the T-Cards within the system to record information, using the wide 'T' part as a title, and the rest of the card to store more details. Use to track samples, tool hire, exhibition equipment, special orders, car servicing, meeting room booking...the list of useful applications is endless!

# Create Your Own T-Card System

If our kits don't suit your needs exactly, it's just as easy to make your own system, choosing from our wide range of panel sizes to create the perfect planning and tracking tool for your requirements.

## STEP 1 How much information per card?

Think about how much information you need to store on the cards, and choose from our size 2, 3, or 4 T-Cards. How will you identify your rows? Choose to use a full size T-Card, or opt for a special smaller-size index card if that suits you better. Finally, how will you identify projects or team members? You can colour-code them, choosing from our range of 8 different colours of T-Cards.

## STEP 2 How many projects or tasks?

You have two dimensions here – number of panels to store information, which should correspond either to your specific time frame, or number of projects/tasks which need tracking, and length of panel required. Choose from 24, 32 or 54 slots, in metal or 35 and 50 slots in plastic, depending upon the amount of information you need per column. The panel width size corresponds with your chosen T-Card size – easy!

## STEP 3 Putting it all together.

Once you have chosen the components for your system, you need to work out how many link bars are required to join the panels together. Link bars connect the top and bottom of the panels, creating a rigid system which can then be wall-mounted.

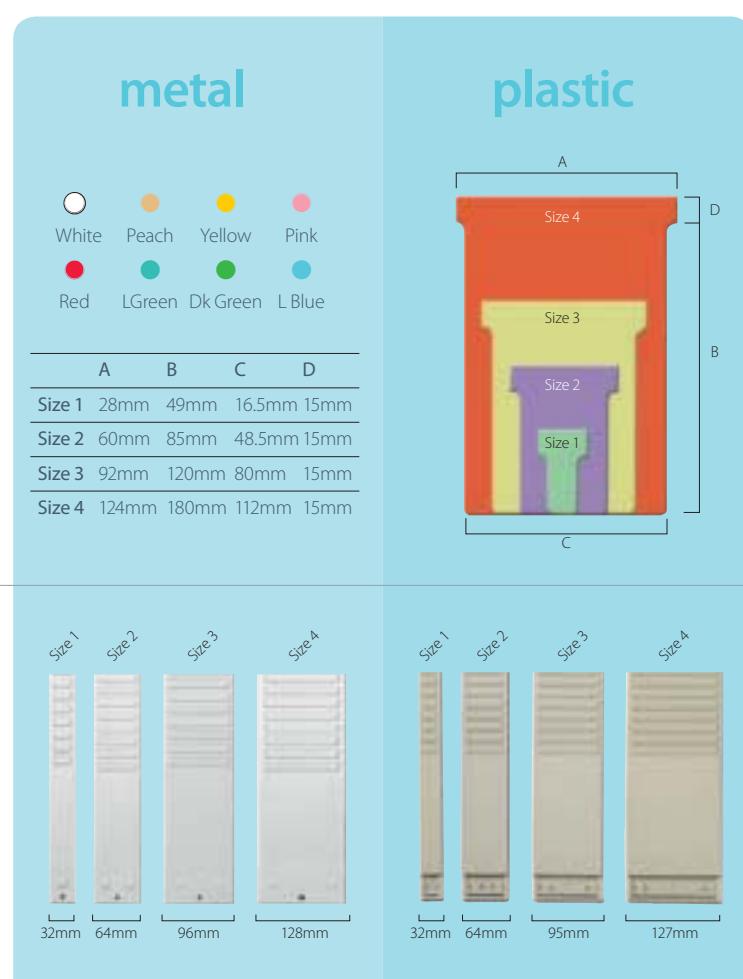

**Metal panels** – link bars clip over the top and bottom panels.

**Plastic panels** – link bars slide across the front of each panel.

Imagine your completed system in front of you, with the panels side by side. Count across, using the T-Card size, eg 1 x index (1) and 7 x size 3 panels (21) is a total of 22. Choose size 24 link bar, and your panels will fit inside.

## STEP 4 Wall mounted or removable?

Once again, you have a choice. For permanent wall mounting, each completed system can be installed using fixings suitable for your walls. If you need to be able to remove the system from the wall to work on, choose a plastic panel system, and once fixed in place with the link bars, use our T-Card Panel tracking to wall mount the system. Two aluminium channels are provided – simply slot the system into the top, then drop into the bottom channel.

# T-Cards and Panels

Make your own T-Card system, choosing from our range of either metal or plastic panels.
